

Job Title: Technical Analyst and SQL Specialist

Salary: From £25,000 (depending on experience)

Are you a SQL Server expert with tenacity, attention to detail and an intuitive feel for IT? We have an opportunity as part of a dedicated team implementing and supporting the UK's best-selling ophthalmology patient records system.

THE ROLE

You will be responsible for implementing, upgrading and extending our SQL-based patient record application on customer infrastructure, as well as investigating and resolving escalated technical queries.

You will be an integral part of our Technical Operations team, working closely with designers and developers of the system as well as our customers.

Working in a smaller company exposes our technical team to broader aspects of the business, including new software and interface implementations, contributing to software development and improving our internal infrastructure.

THE PERSON WE ARE LOOKING FOR

We are looking for someone who can demonstrate:

- Great T-SQL skills;
- DBA experience;
- Ability to understand, modify and test software scripts or code;
- Ideally some exposure to administering Windows Server, IIS, Active Directory or TCP/IP networking.

You will have a strong track record in problem solving, able to:

- Methodically investigate and resolve issues such as bugs or performance problems, including understanding impact of and upon the underlying infrastructure;
- Quickly understand and use new concepts, technologies and systems;
- Discover, analyse, document and satisfy implementation requirements;
- Lead implementation workstreams;
- Learn from experience and continually improve skills, practice and process;
- Develop close professional and productive relationships with colleagues and customers;

- Communicate clearly and accurately as appropriate to the audience.
