WHAT WE DO

Medisoft is an award-winning Leeds-based healthcare IT company; developing and supplying the UK's best-selling ophthalmology patient records system. Our flagship product is used routinely at over 150 hospitals worldwide to help clinical teams assess vision defects and save sight.

WHAT YOU WILL DO

- Installation, upgrade, and interfacing of Medisoft software and modules.
- Contribute to system and data migration projects
- Server migrations
- Liaising with technical and clinical staff at customer sites
- Communicating learnings with colleagues and management

Resolving issues relating to software application, configuration and environment including:

- System performance problems
- SQL Agent job failures
- Medisoft interfaces with medical equipment and other systems
- Reviewing log files, configuration settings, permissions
- Analysing and reproducing application errors
- Implementing configuration changes to address issues

- Researching the causes of problems related to system environment

The successful candidate will need to have:

- Good communication skills with technical and non-technical staff
- High attention to detail
- Able to build rapport with colleagues and customers

Significant experience of the following will be beneficial:

- IT administration and support, including Active Directory and TCP/IP networking
- Basic SQL and scripting

Working for Medisoft is an opportunity to make a real difference to people with eye conditions and the clinical teams who care for them.
