WHAT WE DO

Medisoft is an award-winning Leeds-based healthcare IT company; developing and supplying the UK's best-selling ophthalmology patient records system. Our flagship product is used routinely at over 150 hospitals worldwide to help clinical teams assess vision defects and save sight.

WHAT YOU WILL DO

Under the direction of the mediSIGHT Product Owner, the Lead Developer will develop new features for the mediSIGHT system and will lead a team consisting of at least one other developer, an analyst and a tester.

The role will involve:

- Leading and mentoring a team of developers.
- Working closely with the other software Lead Developers, the Lead Analyst, the Lead Tester and the Product Owner.
- Drive continual process improvements and adoption within the department.
- Leading sprint ceremonies and contributing to release planning.
- Assigning work to the other developer(s) in the team.
- Working with your team to deliver new features meeting the specified requirements.
- Reading and understanding feature specifications written by an Analyst, and providing seeking clarification from the Analyst of any areas that are not clear.

- Ensuring the other developer(s) on the team fully understand the functional specifications.
- Follow agile processes to deliver product increments each sprint.
- Writing and maintaining unit tests.
- Diagnosing and fixing defects found in the system.
- Keeping the software development tools (Microsoft Team Foundation Server) up-to-date.

Significant experience of the following will be beneficial

- Excellent leadership, as well as full stack development skills
- Excellent knowledge of Medisoft's preferred technologies including MS SQL Server , C#, Winforms and WebAPI

Working for Medisoft is an opportunity to make a real difference to people with eye conditions and the clinical teams who care for them.
