WHAT WE DO

Medisoft is an award-winning Leeds-based healthcare IT company; developing and supplying the UK's best-selling ophthalmology patient records system. Our ophthalmology systems are used routinely at over 150 hospitals worldwide to help clinical teams assess vision defects and save sight.

WHAT YOU WILL DO

- Gather surgical, clinical and administrative requirements from ophthalmologists and other healthcare professionals.
- Writing reports on the requirements of users and potential customers of Medisoft's ophthalmology EMR.
- Using wireframe tools to prototype new designs, seeking medical and clinical safety input where necessary.
- Writing detailed functional specifications including screen mock ups and workflow diagrams, which will be used by Medisoft's software developers to deliver new features for the system.
- Gather technical input from the development team to further refine the requirements, including how the data/database should be modelled.
- Contribute to sprint ceremonies and release planning.
- Work with the development team to deliver product increments each sprint.
- Oversee testing of the features specified to ensure they look and work as described in the functional specification.
- Demonstrate new features to the wider business in Sprint Review meetings.

- Raise and manage bugs and improvements based on exploratory testing or user feedback.

Significant experience of the following will be beneficial:

- Previous experience as a Healthcare Software Analyst
- Hands-on knowledge of how to elicit customer requirements and analyse workflows and usage data, in order to define business requirements and use cases.
- Extensive experience of writing functional specifications for new features (not simply enhancements to existing features) for a major software system
- Exceptional verbal and written communication
- Good attention to detail

Working for Medisoft is an opportunity to make a real difference to people with eye conditions and the clinical teams who care for them.
