### ABOUT US

---

Medisoft, the UK's leading provider of software for hospital ophthalmology services and private eye clinics. Medisoft is an award-winning Leeds-based healthcare IT company; developing and supplying the UK's best-selling ophthalmology patient records system. Our flagship product is used routinely at over 150 hospitals worldwide to help clinical teams assess vision defects and save sight.

Our main product, Medisoft Ophthalmology, is used routinely at over 150 hospitals worldwide to help clinical teams assess vision defects and save sight. mediSIGHT® will replace Medisoft Ophthalmology as Medisoft's flagship product, consolidating over 20 years of product development and user feedback.

---

### ABOUT YOU

---

The successful candidate will be a talented Senior Business Intelligence Developer who will be working on a variety of aspects relating to the delivery of end-to-end data warehousing and Business Intelligence solutions. Working with colleagues within the Data Services division and the wider company will be essential.

Main duties and responsibilities include:

- Ongoing maintenance and development of the organisations data warehouse including integration of 3rd party data sources
- Maintain, develop, evaluate and enhance existing BI solutions including ETL processes (SSIS) and end-user reporting (SSRS)
- Lead a small team of BI developers including mentoring; professional and personal development; and general team management
- Investigate, troubleshoot and resolve data errors / discrepancies
- Ensure all development work is carried out to agreed high levels of quality
- Enhance productive working relationships with colleagues and external stakeholders.
- Handle multiple projects simultaneously while ensuring accuracy and timeliness are not compromised.
- Ensure confidentiality and information governance policies are strictly adhered to when working with sensitive data.
- Develop and maintain appropriate documentation e.g. schema documentation and release notes and ensure that such documentation is kept up to date.

Candidates must be able to demonstrate:

- In-depth working knowledge and experience working with relational databases
- Background in data warehouse design (e.g. dimensional modelling) and data mining
- Advanced MS SQL Server skillset (T-SQL, stored procedures, functions, dynamic SQL)
- Proven experience using all components of full Microsoft BI Stack - SSIS, SSAS and SSRS.
- Analytical mind with a problem-solving aptitude
- Strong work ethic
- Meticulous attention to detail with a focus on quality
- Excellent communication and organisational skills
- Leadership and management skills

We don't expect specific knowledge of ophthalmology, but we're looking for a quick learner who is genuinely excited about our product, our market, and how we can improve the practice of specialist eye care. Personal development is a priority for Medisoft and we would encourage the employee to gain wider exposure to the organisations Business Intelligence and develop their management skills.

The post is based at our offices in Leeds, but occasional travel may be required.

**Package:**

To attract and retain the very best talent we offer a generous package, which includes:

- Newly refurbished office with a short walk from Leeds Train Station
- Flexible working; core hours 10:00 – 3:00
- Free on site gym
- Pension contributions
- Annual Team Tour
- Personal development and training opportunities
- Incremental annual leave entitlement
- Cycle & Travel to work schemes

If you think you can bring something special to our award-winning team, please e-mail a current CV with a covering letter explaining what you feel you could bring to our organisation to [HR@medisoft.co.uk](mailto:HR@medisoft.co.uk).
