WHAT WE DO

Medisoft is an award-winning Leeds-based healthcare IT company; developing and supplying the UK's best-selling ophthalmology patient records system. Our flagship product is used routinely at over 150 hospitals worldwide to help clinical teams assess vision defects and save sight.

WHAT YOU WILL DO

Working on developing features for the mediSIGHT ophthalmology patient record system, which is available in English, French and German.

Working as part of a multidisciplinary agile team that includes a Lead Developer, Analyst and Tester, you will develop new mediSIGHT features in C# using the Microsoft technology stack.

The role involves:

- Working as a full stack developer on a team to develop new features for mediSIGHT.
- Reading and understanding functional specifications written by an analyst, and providing seeking clarification from the analyst of any areas that are not clear.
- Working with a team to deliver new features meeting the specified requirements.
- Writing and maintaining unit tests.
- Diagnose and fix defects found in the system.
- Follow agile processes to deliver product increments each sprint.
- Keeping the software development tools (Microsoft Team Foundation Server) up-to-date.

Significant experience of the following will be beneficial:

- Hands-on experience of full project life cycle from initial analysis and design through to coding, testing and maintenance.
- A good grasp of object-oriented programming and all current coding guidelines around C#.NET
- In-depth knowledge of development environment, tools and external libraries within the .NET technology stack

Working for Medisoft is an opportunity to make a real difference to people with eye conditions and the clinical teams who care for them.
